

# Jon Bennett

## coffee powered robot

### Basic Info

**Email:** jon@coffeepoweredrobot.com  
**Web:** coffeepoweredrobot.com  
**Twitter:** twitter.com/coffeerobot

**Mobile:** 07906 401343

**DOB:** 26/05/1990

**Address:** 2 Kirkstall Place, Westlands  
Newcastle-under-Lyme  
Staffordshire  
ST5 3PF

### Education

**2008 - 2011:**  
**Nottingham Trent University**  
**BA Hons.**  
Graphic Design 2:1

**2006 - 2008:**  
**Newcastle Under Lyme College**  
**A Level:**  
Graphic Design A  
Computing B  
Critical Thinking B  
Physics C  
**AS Level:**  
Mathematics B

**2001 - 2006:**  
**Clayton High School**  
**AS Level:**  
Critical Thinking C  
**GCSE:**  
11 Subjects A\* - B

### Work Strategy

I draw on a wide range of technical experience and planning expertise to approach new tasks with efficiency, as opposed to jumping in blindly. I'll often solve problems by composing several possible branches for the final outcome, eventually eliminating them one by one to ensure my result is the best available.

Being primarily a screen-based worker, my background of extensive computer-use allows me to work quickly and freely to produce an outcome once I'm in front of the mouse and keyboard.

### Personality

Rather introverted, but certainly not unsociable. The things I enjoy are the pursuit of knowledge, completing personal goals, and the feeling that something I've done or made cannot be improved upon.

To occupy my spare time, I'm perfectly fine spending time either socialising with friends, relaxing with a large stockpile of videogames, or working on pet design projects (generally leaning towards the latter).

As far as habits in the workplace go, I tend to remain professional and focused in order to stay efficient, but I'll always try to make time to help somebody if they need a hand, since the people I've always held in the highest regard have always done the same for me.

### Technical Strengths

I have a vast amount of experience using Adobe Creative Suite, most notably Photoshop, After Effects and Illustrator, each of which I was fluent in before taking up Graphic Design as a profession. I am comfortable working in both Windows and Mac OS environments.

While certainly competent developing static media for both screen or print, my time at university has edged me towards advancing my skill in motion design, of which I hope to learn more in the future.
